Objective

Motivated and detail-oriented BCA student with a strong foundation in Java, Python, Spring Boot, DBMS, and Data Structures & Algorithms. Seeking an entry-level Software Developer position where I can apply my technical skills, contribute to real-world software solutions, and grow professionally in a collaborative environment.

Experience

- **GM University** AVG 2024 - Pursuing
  Student Trainee (Software Development)
  • Applied Java and Python programming concepts in academic and practical assignments.
  • Worked with DBMS and SQL for designing and managing structured data.
  • Developed backend-focused mini projects using object-oriented programming principles.
  • Practiced data structures and algorithms to strengthen problem-solving skills.
  • Gained exposure to web development using HTML, CSS, and basic JavaScript.
  • Currently learning Spring Boot and Git to align with industry-level development practices.

Education

Course / Degree	School / University	Grade / Score	Year
Bachelor of Computer Application (BCA)	GM University	CGPA: 8.7	Expected 2028

Skills

- Python (Adavanced)
- Java (Intermediate)
- SQL(Intermediate)
- DBMS (Intermediate)
- Spring Boot(Beginner)
- Data Structures & Algorithms (Intermediate)
- React js(Beginner)
- Node.Js (Beginner)
- Git (Beginner)
- GitHub (Beginner)
- HTML (Advanced)
- CSS (Intermediate)
- JavaScript (Beginner)
- Problem Solving
- Logical Thinking
- Communication
- TeamWork
- Time Management

Projects

- **Student Management System (Java)**
  Developed a Java-based application to manage student records including add, update, delete, and view operations. Implemented object-oriented programming concepts and used DBMS for data storage. Focused on clean code structure, data validation, and efficient record handling.
- **Python-Based Data Management Application**
  Built a Python application to perform data processing and management tasks using structured logic and functions. Implemented file handling and database connectivity for storing and retrieving data efficiently. Improved problem-solving and backend logic skills.
- **Library Management System**
  Designed and developed a library management system using Java and DBMS to manage books, users, and issue/return operations. Applied SQL queries for data manipulation and followed modular programming practices to enhance

maintainability.

- **Basic Web Application using HTML,CSS, and Java**
  Created a responsive web interface using HTML and CSS and integrated backend logic using Java. Focused on form handling, user interaction, and basic validation to understand full-stack application flow.

Languages

- ENGLISH, KANNADA, HINDI, TELUGU.

Declaration

- I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
